

A. The Licenses We Need from Microsoft 365

Microsoft 365 offers a variety of licenses, such as **Business Standard**, **Business Premium**, **Enterprise E3**, and **Enterprise E5**. These licenses can be chosen based on the needs of our company. Since we cannot use **A-licenses** due to restrictions, I will assign the best license for each employee based on their role.

I have divided the employees into license groups as follows:

1. **IT Manager and Technician (2 persons)**
 - **License: Enterprise E3**
 - **Reason:** This group requires deep-level admin features, security, and full access to Microsoft 365 tools.
 2. **Sales Staff and Sales Manager (15 persons)**
 - **License: Business Standard**
 - **Reason:** This group only needs access to emails, Teams, and Office apps, without advanced security features or admin tools.
 3. **Finance Manager and Finance Team (4 persons)**
 - **License: Enterprise E3**
 - **Reason:** This group handles sensitive information and requires enhanced security and data protection.
 4. **Admin Staff and CEO (4 persons)**
 - **License: Business Standard**
 - **Reason:** This group will get **Business Standard** unless any member takes on more advanced responsibilities, in which case they will be upgraded to **Enterprise E3**.
 5. **Warehouse Staff (2 persons)**
 - **License: Business Standard**
 - **Reason:** This group just needs to access email and Teams to communicate with each other.
 6. **Drivers (2 persons)**
 - **License: Business Standard**
 - **Reason:** This license is suitable for access to Teams and email.
 7. **Freelancers (2 persons)**
 - **License: Business Standard**
 - **Reason:** If freelancers need temporary access to emails or Teams, **Business Standard** will be sufficient.
-

B. The Procedure for Acquiring Microsoft 365

The following steps will be taken to acquire Microsoft 365:

1. **Examine the Plan**
 - Understand the current IT environment and user demands.

- Based on user roles, determine the licenses required.
 - 2. **Select the Right Microsoft 365 Plan**
 - Choose stable licenses for each group of users based on their roles.
 - 3. **Prepare for the Migration**
 - Ensure the domain is ready to connect with Microsoft 365.
 - Verify that the current email system is compatible for migration.
 - Backup data in case of any issues during migration.
 - 4. **Set Up the Microsoft 365 Tenant**
 - Purchase the licenses from Microsoft or a third-party partner.
 - Set up the email domain, configure security settings, and create user accounts.
-

C. Cost Calculations

To determine the total cost, the price for each license must be known. Based on current pricing, I calculated the following:

- **Business Standard:** \$12.50 per user/month
- **Business Premium:** \$22.00 per user/month
- **Enterprise E3:** \$36.00 per user/month

Breakdown of Users and Costs per Month:

- **IT Manager & Technician (2 people) – Enterprise E3**
2 users x \$36 = **\$72**
- **Sales Staff & Sales Manager (15 people) – Business Standard**
15 users x \$12.50 = **\$187.50**
- **Finance Team (4 people) – Business Premium**
4 users x \$22 = **\$88**
- **Admin Staff + CEO (4 people) – Business Standard**
4 users x \$12.50 = **\$50**
- **Warehouse Staff (2 people) – Business Standard**
2 users x \$12.50 = **\$25**
- **Drivers (2 people) – Business Standard**
2 users x \$12.50 = **\$25**
- **Freelancers (2 people) – Business Standard**
2 users x \$12.50 = **\$25**

Total Monthly Cost:

$$\$72 + \$187.50 + \$88 + \$50 + \$25 + \$25 + \$25 = \mathbf{\$472.50}$$

Total Annual Cost (excluding VAT):

$$\$472.50 \times 12 = \mathbf{\$5,670}$$

D. Why These Licenses Were Chosen

1. **IT Manager & Technician**
 - **License: Enterprise E3**
 - **Reason:** This group needs advanced security features, device management, and data protection.
2. **Sales Team**
 - **License: Business Standard**
 - **Reason:** The sales team needs basic tools for communication and storage, such as email, Teams, and OneDrive.
3. **Finance Team**
 - **License: Business Premium**
 - **Reason:** Given the sensitive nature of financial data, this group needs enhanced security and threat protection.
4. **Admin Staff & Warehouse Staff**
 - **License: Business Standard**
 - **Reason:** These groups need access to Microsoft 365 tools for general administrative tasks (email, file storage, Teams).
